AUDIO VAULT
Instruction Manual

iSound: The New Sound

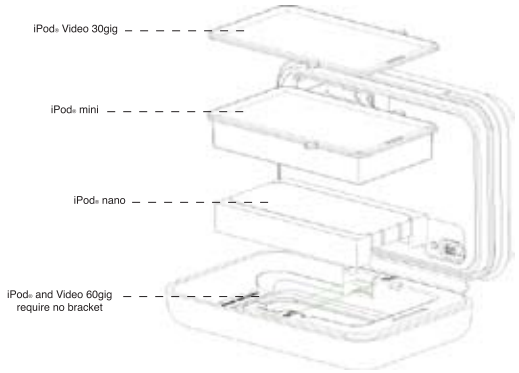
Box Contents
- Audio Vault Speaker System
- iPod® Brackets
- Instruction Manual

Battery Installation:

1. Open the battery door on the main speaker casing.
2. Insert 4 "AAA" batteries into the battery compartment.
3. When inserting the batteries follow the polarity (+ and -) symbols that are marked on the compartment base, close the battery door.

iPod®/MP3 Installation:

1. Connect your audio source (iPod®, iPod® video®, nano®, mini® or any other MP3 player) to the unit by plugging the built-in 3.5mm audio cable to the headphone input/audio output on your audio device.
2. When placing your iPod® into the Audio Vault make sure you choose the proper iPod® bracket. The Audio Vault includes different brackets for different sized iPod's®. Each iPod® bracket has an iPod® name for which it should be used. For non-iPod® MP3 players choose an iPod® bracket that securely holds your MP3 player inside the Audio Vault.



NOTE: Standard iPod's® and iPod® video 60gig do not require any bracket for the iPod® to be used with the Audio Vault.

Speaker Operation:

1. Turn on the speaker by sliding the power switch located inside the Audio Vault to the "MUSIC" position, the blue LED will light to indicate the Audio Vault is powered on.
2. You can now close the Audio Vault and control your iPod® using the transparent window located on the front of the Audio Vault. The Audio Vault's transparent window allows you to fully control your iPod® without having to remove your iPod® from the Audio Vault.
3. When using non-iPod® MP3 players, you may have to set the controls of the MP3 player before placing it into the Audio Vault.
4. To turn off the speaker, slide the power switch to the "OFF" position, the blue LED will turn off.

Wake to iPod® Operation:

The wake to iPod® feature allows you to use the music on your iPod® as a personal musical alarm system.

1. Set the alarm settings on your iPod® following the instructions that came with your iPod® player.
2. Slide the power switch on the Audio Vault to the "ALARM" setting.
3. The Audio Vault unit will stay in sleep mode until your iPod's® alarm goes off.
4. When the alarm goes off, the Audio Vault will play the last song that was selected on your iPod®. You can set your iPod® to your favorite song before the alarm goes off if you choose.
5. When using the Wake to iPod® feature your iPod® should be powered on while it's inside the Audio Vault. Your iPod® will automatically go into sleep mode to preserve the iPod's® battery life.
6. Make sure your iPod's® volume is at a suitable level before the alarm goes off.

NOTES:
- *There will be 3-5 seconds time delay from when the alarm goes off and the music starts playing.*
- *The volume of the Audio Vault is always controlled by the connected audio device.*
- *The wake to iPod® music feature will not work with non-iPod® audio devices.*
